Cybersecurity Specialist

Solutions Specialist | Security Analyst | Account Manager | Project Expeditor | Customer Support
Creative Problem Solver | Self-Motivated | Critical Thinker

Motivated and hard-working professional with a passion for cybersecurity and information technology. Ability to identify, contain, resolve, and mitigate security threats. Dependable, responsible, and always willing to go the extra mile.

Professional Experience

Project Expeditor   May 2021 – June 2023
M.O.D. Design | Denver, CO

- Oversee project timelines with an emphasis on resolving production issues to expedite lead-times and deliver outstanding products ahead of schedule.
- Monitor project elements between 50+ manufacturers and 200+ clients to ensure consistent communication and updates.
- Coordinate installers, contractors, subcontractors, receiving warehouses, and repair technicians for project installation.
- Review quotes, invoices, purchase orders, and budget proposals for accuracy.
- Maintain professional and consistent communication with project managers, lead designers, and relevant stakeholders.

Account Manager   December 2018 – December 2020
TOWN Studio | Denver, CO

- Manage 200+ B2B accounts with over 2 million in yearly sales.
- Procure and develop client relationships by providing outstanding customer service, quick response times, and extensive product knowledge.
- Assist manufacturers and clients in the development of custom design solutions for high-end projects.
- Generate client quotes and invoices with a high degree of accuracy.

Solutions Specialist   December 2017 – December 2018
Verizon Wireless | Parker, CO

- Provide tier 1 technical support for mobile devices and network connectivity.
- Recommend innovative solutions for business and retail customers that meet requirements and improve functionality.
- Facilitate sale of mobile devices with an emphasis on up-selling accessories and additional solutions.

Wi-Fi Help Desk Associate   December 2015 – December 2017
Royal Caribbean Cruise Lines | Miami, FL

- Assist guests in the purchase and set-up of Wi-Fi packages while on board.
- Troubleshoot Wi-Fi connectivity issues.
- Log transactions and analyze purchasing trends.
